

## **HEALTH SERVICES AND INFORMATION SYSTEM**

Charles Bluth and James Bluth

### **ABSTRACT OF THE DISCLOSURE**

A health kiosk provides blood pressure testing, a health and fitness evaluation, and a medication encyclopedia. The health kiosk typically interfaces to a computer or server, such as a pharmacy computer or a remote server which compares pharmaceuticals selected by a user to information in the medication encyclopedia to determine compatibility for prescription medications and over-the-counter medications. In some systems, the kiosk also supplies one item or more of an extended health information, a weight scale constructed into the seat of the kiosk, a directory of health care service and product providers, an a directory of community health, support, and service groups.
